HOT SIDE FLUID

COLD SIDE FLUID

Description and chemical composition.....

Rate of flow

- a) Liquid.....
- b) Vapour.....
- c) Non condensable gas.....
- d) Fluid Vaporized or condensed....

Inlet Temperature.....

Outlet Temperature.....

Inlet Pressure.....

Maximum permissible pressure drop.....

Maximum working pressure.....

Molecular Weight

- a) Vapour.....
- b) Non Condensables.....

Density (liquids)

Specific heat at mean temperature.....

Thermal conductivity at mean temperature.....

Viscosity at several temperatures.....

In operating range.....
.....
